SUNDAY NEWS

As we inch closer to the end of 2016, we would like to take this opportunity to thank our partners, clients and friends who have helped us along the way to get to where we are and in doing so, making the world a greener place by using clean renewable solar energy.

Let's take a quick look at some of the the SunQuote projects which we helped to get the best EPC installer (and of course price) for our clients.

Later we will share with you some of the projects which we helped to crowd fund under our SunVest program. By crowd funding for their solar PV projects, our clients managed to defray their initial upfront costs of the system by paying back in monthly instalments.

First, a quick recap on our projects which we helped our clients to find the best installer for their solar PV system:
